

## **Blodgett Oven Operation**

**Ovens operate on Propane Gas Only**

**Ovens operate on 110 Volts AC Only**

**To Turn On Oven:**

- 1 Make sure switch is on auto**
- 2 Make sure gas is turned on**
- 3 Make sure oven is plugged in**
- 4 turn mode switch to cook**
- 5 Set temperature knob to desired setting**
- 6 You will hear a sparking sound...the oven is attempting to light the pilot**
- 7 Before the oven pilot burner will light, all air must be cleared from the pilot line**
- 8 It may not light on the first attempt!!!**
- 9 If the red indicating light does not come on in the first 60 seconds, turn mode switch to off and repeat Step 3**
- 10 It may be necessary to repeat several times**
- 11 When red indicating light comes on...the oven is calling for heat**
- 12 When red indicating light goes off...oven is at temperature**
- 13 Ovens should always remain under cover**
- 14 Wind can directly effect proper ignition of ovens**
